

IMPLEMENTATION OF HIGH LEVEL SYSTEM  
SCADA ONEVIEW® FOR INTEGRATION OF RENEWABLE ENERGY  
SOURCES IN WIND AND HYDRO AREA  
WITH THE PURPOSE OF WORK MONITORING  
AND CONTROLLING

Krzysztof KOMENDZIŃSKI, Paweł RYTLEWSKI

**ABSTRACT** *The effectivity of concurrent using of Renewable Energy Sources of different character, like wind and hydro power plants requires modern hardware and software tools called SCADA (Supervision, Control and Data Acquisition). An example of such solution is the system OneView® SCADA provided by SCADA International company and implemented by ENEA Wytwarzanie.*

**Keywords:** *SCADA, renewable energy sources, integration of renewable energy sources*
